Name of the study program:	Master of Science in Business Administration
Duration of the study program:	2 years (4 semestres)
ECTS:	180 ECTS
Study:	Full Time
Diploma:	Master of Science in "Business Administration"
Language:	Albanian

PROGRAM OBJECTIVES

The goal of the Master of Science in Business Administration program is to offer advanced studies for all students in the field of business administration, enable the development of research work in this field, and prepare professionals in the field of management; career development in a company, as well as the involvement of alumni in academic activities, along with employment and/or scientific research, or pursuing a third cycle program.

The main objective of the Master of Science in Business Administration study program is to prepare students with strong and sustainable skills for human resource management, entrepreneurship, marketing, strategic management, and operations management required by managers and/or shareholders in the professional management of businesses. Additionally, this study program aims to fulfill the following objectives:

- To offer students contemporary knowledge and enable them to acquire skills in the fields of accounting and finance necessary for the sound management of the business and to allow them to continuously benefit from the environment in which businesses operate.
- To prepare students with leadership and communication skills necessary for good entrepreneurs to lead and support new business operations, and to gain market share through effective communication with consumers, clients, and colleagues. This is built on a strong foundation of ethical practices and diverse perspectives.

- To develop students' skills to solve problems related to research, development, or innovation to support new business operations, as well as to gain market share.
- To equip students with skills in information management and communication technologies as an integral part of the program.
